

Electronic Documentation of Economics Senior Thesis
“Moral Hazard and the National Flood Insurance Program”
 by Mary McGee, Colgate University, April 2014

DATA APPENDIX

Table 1: Variable definitions and Sources

Variable	Definition	Missing Values	Original Variable Name	Changes to Original Variable	Source
<i>Δnfip_policies</i>	Change in the total number of NFIP policies in force from the previous year	0/33	“Number of Policies in Force”	Copied values for 1978 - 2010, omitted commas, calculated first difference	2013 Congressional Research Service Report, <i>The National Flood Insurance Program: Status and Remaining Issues for Congress</i> (King, 2013)
<i>lnclaims</i>	Number of claims paid by the NFIP, logged	0/33	“Total number of Claims Paid”	Copied values for 1978 – 2010, omitted commas, logged values	2013 Congressional Research Service Report, <i>The National Flood Insurance Program: Status and Remaining Issues for Congress</i> (King, 2013)
<i>lnclaimvalue</i>	2010 value of claims paid by the NFIP, logged	0/33	“Total Payments Made to Policyholders”	Copied values for 1978 – 2010, omitted commas and dollar signs, converted to 2010 dollars, logged values	2013 Congressional Research Service Report, <i>The National Flood Insurance Program: Status and Remaining Issues for Congress</i> (King, 2013)
<i>lnsba</i>	2010 value of Disaster Loans paid by the SBA, logged	0/33	“Total: Dollar”	Copied values for 1978 – 2010, omitted commas and dollar signs, converted to 2010 dollars, logged values	Freedom of Information Act Request (FOIA Request # 2013-1202-1) (FOIA, 2013)
<i>lndrf</i>	2010 value of total appropriations to the Presidential Disaster Relief Fund, logged	2/33	“Total Appropriations: Nominal”	Copied values for 1978 – 1988 into excel, omitted commas, multiplied by 1,000,000 (originally reported in millions), converted to 2010 dollars, logged values	1978-1988: 2005 Congressional Research Service Report, <i>Federal Stafford Act Disaster Assistance: Eligible Activities, and Funding</i> (Bea, 2005)

			“Total Nominal”	Copied values for 1989 – 2010, omitted commas, multiplied by 1,000,000 (originally reported in millions), converted to 2010 dollars, logged values	1989-2010: 2011 Congressional Research Service Report, <i>Disaster Relief Funding and Emergency Supplemental Appropriations</i> (Lindsay and Murray 2011)
<i>lndamages</i>	2010 value of total amount of damages caused by natural disasters, logged	1/33	“Total damages (‘000 USD)”	Copied values, multiplied by 1,000 (originally reported in thousands), converted to 2010 dollars, logged values	The International Disaster Database: Centre for Research on the Epidemiology of Disasters (EM-DAT, 2013)
<i>laglndamages</i>	<i>lndamages</i> lagged 1 year (t-1)				
<i>floods</i>	Number of significant flood events	0/33	“Significant Flood Events”	Counted number of flood events recorded for each year	<i>Flood Insurance Statistics: Significant Flood Events</i> (FEMA, 2014)
<i>lagfloods</i>	<i>floods</i> lagged 1 year (t-1)				
<i>year</i>	each year 1978-2010				
<i>fira94</i>	dummy variable taking a 1 after 1994 and a 0 before				
<i>fira94*trend</i>	<i>fira94</i> interacted with <i>year</i> , it takes the value of each year after 1994 and a 0 before				
<i>fira04</i>	dummy variable taking a 1 after 2004 and a 0 before				
<i>fira04*trend</i>	<i>fira04</i> interacted with <i>year</i> , it takes the value of each year after 2004 and a 0 before				

<i>grant06</i>	dummy variable taking a 1 after 2006 and a 0 before				
<i>grant06*trend</i>	<i>grant06</i> interacted with <i>year</i> , it takes the value of each year after 2006 and a 0 before				

Table 2: Summary Statistics – Level Variables

	<i>nfip_policies</i>	Δ <i>nfip_policies</i>	<i>nfip_claims</i>	<i>nfip_claimvalue</i> *	<i>sba</i> *	<i>drf</i> *	<i>damages</i> *	<i>floods</i>
Min	1466354	-188786	7758	27.7	59.1	0	0	0

Table 3: Dickey-Fuller Test Results (using trend option)

Variable	Test Statistic	P-Value
<i>nfip_policies</i>	-1.574	0.8023
Δ <i>nfip_policies</i>	-3.508	0.0386
<i>nfip_claims</i>	-5.553	0.0000
<i>nfip_claimvalue</i>	-5.629	0.0000
<i>sba</i>	-5.297	0.0001
<i>drf</i>	-5.459	0.0000
<i>damages</i>	-5.057	0.0002
<i>floods</i>	-6.170	0.0000

Notes:

N=32

1% critical value = -4.316

5% critical value = -3.572

10% critical value = -3.223

Table 4: Breusch-Godfrey Test Results

Dependent Variable	Chi-squared	Degrees of Freedom (lags)	P-Value
Δ <i>nfip_policies</i>	0.397	1	0.5287
--	2.045	5	0.8430
--	4.690	10	0.9109
<i>nfip_claims</i>	4.768	1	0.0290
--	11.465	5	0.0429
--	15.082	10	0.1291
<i>nfip_claimvalue</i>	0.555	1	0.4563
--	6.395	5	0.2697
--	25.579	10	0.0043
